ALEX MORGAN
Senior Python & Django Full-Stack Developer
Email: alex.morgan@example.com | Location: Remote

PROFESSIONAL SUMMARY
Results-driven Full-Stack Software Engineer with 5+ years of experience designing and scaling web applications using Python, Django, REST APIs, and modern frontend technologies. Strong background in relational databases, microservices architecture, and clean code principles.

TECHNICAL SKILLS
- Languages & Frameworks: Python, Django, Django REST Framework, JavaScript, HTML5, CSS3, Tailwind CSS, SQL
- Databases & Caching: PostgreSQL, SQLite, Redis
- Version Control & Tools: Git, GitHub, Linux, Celery, pytest

PROFESSIONAL EXPERIENCE
Senior Backend Engineer | CloudScale Systems (2022 - Present)
- Architected and deployed scalable RESTful APIs in Django serving 1.5M monthly active users.
- Optimized PostgreSQL queries and ORM lookups, reducing average database latency by 38%.
- Integrated third-party AI APIs (LLMs) and payment gateways with robust rate limiting and error handling.
- Conducted regular code reviews, mentored 4 junior developers, and enforced high test coverage (>85%).

Full-Stack Developer | WebCraft Solutions (2019 - 2022)
- Built interactive SaaS dashboards using Django, HTML5, JavaScript, and Tailwind CSS.
- Automated business reporting pipelines using Celery task queues and Redis caching.
- Collaborated with UI/UX designers to implement accessible, responsive layouts.

EDUCATION & CERTIFICATIONS
- B.S. in Computer Science | State University
- Certified Python Professional
